Booklet #5a Reissued January 29, 2009

DRAFT FISCAL IMPACT ANALYSIS

Overview

This booklet summarizes the fiscal impacts of various land uses in Tolland for fiscal year ending (FYE) 2008. A fiscal impact analysis attributes local expenditures and revenues to various land uses, such as single family and multi-family houses, apartments/condominiums, commercial development, industrial development, and open space. The results indicate which land uses tend to require more in services than they provide in revenues to the Town and which land uses support other land uses by providing a revenue surplus.

A Fiscal Impact Analysis can help residents and local officials better understand potential fiscal impacts of land use decisions. All land uses require some level of service and most land uses generate some amount of revenue, predominantly through property taxes.

The fiscal impact of land uses is only one consideration when planning for the future of a community. Some land uses play important community roles yet do not provide fiscal benefits, and conversely there may be some fiscally positive uses that would not fit the character of a community.

Key findings from the Tolland Fiscal Analysis include:

- Tolland's single-family housing units required more in services than they provided in taxes
- Multi-family housing, commercial and industrial uses, public utilities, and PA 490 land all provided a positive fiscal impact in Tolland they paid more in taxes than they received in services
- Tax exempt uses had a fiscal impact in Tolland that is almost equal in magnitude to the impact of single-family housing

The results of the analysis are on the next two pages, followed by a more detailed explanation of the method of analysis.

5a

Results

The analysis is a point-in-time calculation based on fiscal year ending (FYE) 2008 revenues and expenditures and the 2007 grand list. Therefore, the results are only applicable to FYE 2008. However, Tolland's results are similar to other communities and may likely represent the generalized fiscal impact of land uses in any year.

Residential Uses

In FYE 2008, residential uses in Tolland paid just over \$30 million in taxes, but received almost \$32 million in services. When looking at all types of residential uses, however, the analysis indicates that only single family housing (the 1-4 unit category) received more in services than paid in taxes, with a net fiscal impact of \$2.6 million. As one would expect, the primary driver of the fiscal impact of housing is the cost of educating students.

Vacant residential land and multi-family housing paid more in taxes than they received in services. But because 93% of Tolland's housing stock is single family, its negative impact outweighs the positive impacts of vacant land and multi-family housing.

Total Revenue		Net Expenditures	Net Fiscal Impact
Residential	\$ 30,409,552	(\$31,978,667)	(\$1,569,115)
Vacant Land	\$ 47,094	(\$11,165)	\$35,930
Vacant Lot	\$959,673	(\$227,511)	\$732,161
1-4 Unit Bldg.	\$28,672,901	(\$31,295,073)	(\$2,622,172)
Apartment	\$ 188,404	(\$119,150)	\$69,253
Condo Unit	\$ 541,480	(\$325,767)	\$215,713

Commercial / Industrial / Public Utility Uses

The analysis indicates that revenue generated by Tolland's business uses and public utility land exceeds the Town's expenditures for services to these uses. Of these business uses, commercially developed land provided the largest fiscal benefit. This fiscal surplus means that businesses and public utilities provide \$1.6 million in support for other land uses. In other words, businesses help fill the fiscal gap created by uses such as single family houses, in addition to providing jobs and services.

Commercial	Total Revenue Commercial \$ 2,120,991		Net Fiscal Impact
	.,,,	(\$508,155)	\$1,612,836
Vacant Land	\$ 11,474	(\$2,720)	\$ 8,754
Comm. Dev.	\$2,109,517	(\$505,434)	\$1,604,083
Industrial	\$816,563	(\$193,584)	\$ 622,979
Industrial Dev.	\$816,563	(\$193,584)	\$ 622,979
Public Utility	\$15,600	(\$3,698)	\$ 11,901

Public Act 490 Uses

Public Act 490 uses include land owned by a private party or a non-tax exempt organization that is assessed as farm, forest or open space land under the Public Act 490 program. This category does not include dedicated open space (which is categorized as a tax exempt use). Since these uses do not produce residents or school children, they require few services. As a result, PA 490 land provides a surplus of just over \$37,000 in Tolland.

	Total Revenue	Net Expenditures	Net Fiscal Impact
Private Open Space	\$49,187	(\$11,661)	\$37,526
Farm	\$16,038	(\$3,802)	\$12,236
Forest	\$15,662	(\$3,713)	\$11,949
Open Space	\$17,487	(\$4,146)	\$13,341

Tax Exempt Uses

Tax exempt uses include federal, state, and local property, along with non-profit entities, such as land trusts, historical societies, religious uses, and other uses. This category includes permanently protected open space. Since tax exempt uses do not pay taxes, yet receive services from Tolland (fire, police, road plowing, etc.), by nature they have a negative fiscal impact on the Town. Similar to single family houses, this means that taxes generated by other land uses pay for the services that support tax exempt land uses.

The only exception in Tolland is state-owned property, since the Town receives a payment in lieu of taxes (PILOT) from the State. Municipal properties require the most in services, as would be expected since there are more municipal properties and facilities than the other categories.

This category helps demonstrate why land use decisions should not be made solely on fiscal impacts. Tolland's quality of life would be much different if these tax exempt uses did not exist in town.

Tax Exempt Properties	Total Revenue \$65,668	Net Expenditures (\$781,796)	Net Fiscal Impact (\$716,128)
Federal	<i>\$03,000</i>	(\$6,838)	(\$6,838)
State	 \$65,668	(\$44,642)	\$21,026
Municipal (inc. VFD)	40 0 ,000	(\$645,746)	(\$807,003)
Educ/Hist/Charitable		(\$38,722)	(\$48,528)
Agric/Hort. Societies		(\$1,856)	(\$2,325)
Religious Facilities		(\$35,101)	(\$43,892)
Non-Profit Camps, Rec.		(\$8,640)	(\$10,828)
Private Colleges & Hospitals		(\$124)	(\$106)
Misc.		(\$126)	(\$158)

Detailed Method of Analysis

The analysis is based on the concept of "net expenditures." The term "net expenditures" refers to the money that a town needs to raise through taxes for a particular program area. Net expenditures are determined by subtracting non-tax program revenue (e.g., user fees, state aid) from program expenditures. For example, state education grants are deducted from education expenditures to determine the education expenditures supported by tax revenues.

Overall, the analysis required the following steps:

- 1. Allocate residents and students to each land use
- 2. Calculate revenue by land use
- 3. Calculate net expenditures
- 4. Compare tax expenditures to tax revenues for each land use

These steps are explained in more detail here.

Step 1: Allocate Residents and Students to Each Land Use

Land use categories are based on property assessment reporting requirements of Connecticut municipalities. These categories are:

Residential Uses

- Vacant residentially zoned land
- Vacant residential lots
- 1 4 family residential uses
- Residential condominiums
- Apartments
- Mobile Homes

Commercial Uses

- Vacant commercially zoned land
- Commercial buildings
- Commercial condominiums

Industrial Uses

- Vacant industrially zoned land
- Industrial buildings
- Industrial condominiums

Public Utility Uses

• Land and facilities used by public utility companies

Public Act 490 Uses

• Private land assessed for farm, forest or open space use

Tax Exempt Uses

- Federal, state, or local lands or facilities (e.g., schools) that are tax exempt
- Private lands or facilities (e.g., religious buildings) that are tax exempt

Next, Tolland's residents and students were distributed among the various land uses. The 2007 population estimates are from the Connecticut Economic Resource Center, Inc. (CERC). Assumptions about how many residents lived in apartments, condominiums and nursing homes were estimated based on the number of units. The "Public Tax Exempt – Local" entry in the table is for the two town-operated income-qualified senior housing developments. The Town provided information on the number of residents for these uses.

The total number of pupils came from official school enrollment figures. The Superintendent's office also provided the number of students that live in apartment or condominium developments in Tolland.

The data indicate that very few pupils in the Tolland school system live in condominiums or apartments.

Use	2007 Pop- ulation	2007 Pupils	2007 Units	Pop./ Unit	Pupils/ Unit
Total	14,301	3,131	5,241	2.73	0.60
Residential

Local	92	-	61	1.51	-
Private Tax Exempt					
Religious Facilities	4	-	2	2.00	-
Private	2	-	1	2.00	-

Stabilized Revenue

This analysis is based on Tolland's "stabilized revenue." This is the revenue needed to cover expenditures only and excludes revenue added to the fund balance.

In FYE 2008, Tolland's actual revenue totaled \$47,184,913. Of that total, \$46,961,663 was used to cover expenses and \$223,250 was added to the fund balance.

This analysis used the \$46.9 million figure since this reflected the amount of revenue needed to cover expenditures.

Using the higher figure would make uses appear more fiscally positive than they may be.

Step 2. Calculate Revenue by Land Use

Revenues in Tolland come from taxes, intergovernmental revenue, the state payment in lieu of taxes (PILOT) program, user fees, and other sources. The following table breaks down Tolland's revenues (see sidebar). The majority of Tolland's revenues (64%) come from residential taxes.

Source	Stabilized Revenue	0/0
Non-Residential Taxes	\$3,002,340	6%
Residential Taxes	\$30,409,552	65%
Non-Tax	\$13,549,771	29%
Total	\$46,961,663	100%

Revenue Types

Tax Revenues

- Taxable
- PILOT Payments

Non-Tax Revenues

- State/Federal Aid
- Fines/Fees (User Fees)
- Investments
- Use of Fund Balance

In 2007, Tolland had a Taxable Grand List of over \$1.2 billion; this includes real estate, vehicles and personal property. When adding in tax exempt properties, the Consolidated Grand List totals just over \$1.3 billion. The following table attributes Tolland's grand list to each land use category. As the table indicates, Tolland is heavily reliant on residential development for its tax base.

Category	Amount	%
Residential	\$1,113,793,662	91%
Commercial	\$77,684,344	6%
Industrial	\$29,907,788	2%
Public Utility	\$571,360	<1%
Private Open Space	\$1,801,550	<1%
Taxable Grand List	\$1,223,758,704	100%
Tax Exempt	\$119,845,740	
Consolidate Grand List	\$1,343,604,444	

Step 3. Calculate Net Expenditures

In the 2007-2008 fiscal year, Tolland's expenditures totaled \$46,961,663 (this excludes the roughly \$220,000 million added to the fund balance).

The total net expenditures for education was allocated to the "pupils" category. The total of all net expenditures for services provided to residents, such as the library, elderly services, youth services was allocated to the "residents" category. Some town hall departments also directly serve residents, such as the Registrar of Voters. The remaining net expenditures, such as fire and police service, were allocated to the "property" category (see sidebar and page 12).

The following table shows the allocations to these three categories. Overall, expenditures for pupils comprised the largest portion of the Town's expenditures while services to residents comprised a very small portion. Taxes bridged the gap between non-tax revenues and expenditures – the table indicates that taxes needed to fill a revenue gap of \$62 per resident, \$7,600 per student and just over \$6 per every \$1,000 of property values.

Services	Expenditures	Non-Tax Revenue	Net Expenditure	Per	Unit
To Residents	\$899,545	\$13,597	\$885,948	\$61.95	per resident
To Pupils	\$34,585,455	\$10,690,581	\$23,894,874	\$7,631.71	per pupil
To Property	\$11,476,663	\$2,779,925	\$8,696,738	\$6.47	Per mill
Total	\$46,961,663	13,484,103	\$33,477,560		

Allocation of Expenditures

Services to Residents

(allocated on a per capita basis)

- Recreation
- Library
- Youth and Senior Services
- Other programs

Services to Pupils

(allocated on a per pupil basis)

Education

Services to Community

(allocated on an assessed value basis)

- General Government
- Public Works
- Public Safety
- Debt Service

See page 12 for full breakdown.

Next, the analysis assigns this net expenditure data to land uses, based on a variable (the variable is the "per unit" column in the above table).

To assign pupil-related expenditures, we determined the amount spent per pupil. We do the same for residents. Since we have allocated residents and pupils to each land use, we multiple the number of residents and pupils in each land use by the per resident and per pupil expenditures.

To assign property-related expenditures to each land use, we assume that the proportion of the total expenditures on services to property equals the proportion that the land use comprises of the grand list. For example, if the grand list for all properties in a land use category comprises 30% of the total grand list, we assume that town property-related expenditures equals 30% of total property-related expenditures.

These three numbers are then tallied for each land use to provide the total expenditures per land use. While all land uses generate expenditures for property, not all generate expenditures for residents or pupils.

Step 4. Compare Net Expenditures to Tax Revenues for Each Land Use.

This final step involves subtracting the net expenditure for each land use from the total revenue each land use generates. If the result is a positive number, it means that the land use generates more in taxes than it receives in services. If the result is a negative number, then that land use requires more in services than it generates in taxes. The findings were discussed earlier, in the Results section.

Detailed tables are contained on the following pages.
