

# **FIRE FIGHTING APPARATUS – 1500 GPM RESCUE PUMPER**

## **ADDENDUM #1**

We have received a few questions regarding the Tolland Rescue Pumper truck bid. In order to clarify a few things please refer below.

1. Regarding the following statement, we only need *one original* and *two hard copies*. Sorry for the confusion.

A. Please place **one (1) original and three (2) hard copies** of your response in a sealed envelope and clearly label in the lower left corner **“1500 GPM RESCUE PUMPER”**. No faxed, emailed, or telephone statements will be accepted.

**2. All bidders shall place a "Y" for yes or a "N" for no next to each and every paragraph in the column provided on the right hand edge of the paper, indicating compliance or noncompliance with that paragraph of the specifications.**

The “yes or no” column was omitted in the above conversion. Please put a Y or N next to the end of each paragraph.

3. Included on page 18 is the water and foam tank capacity as follows:

### **WATER & FOAM TANK CAPACITY**

The chassis shall include a carrying capacity of 750 gallons (2839 liters) to 1250 gallons (4732 liters). The water and/or foam tank(s) shall be supplied and installed by the apparatus manufacturer.
