TOWN OF TOLLAND
PLANNING AND ZONING COMMISSION
APPLICATION FOR SITE PLAN OR SPECIAL PERMIT APPROVAL

PZC # 22-3

What are you applying for? (check one):

- [x] Site Plan (new)
- [ ] Site Plan Modification
- [x] Special Permit (new)*
- [ ] Special Permit Modification*

**Most special permit applications require submittal of a site plan, with no additional fee for site plan required.*

Property Information

Property Address: 10 Fieldstone Commons
Property Owner: Fieldstone Ridge, LLC
Zone: GDD **Map/Block/Lot:** 28/C/002; 28/C/002.02; 28/C/025

Applicant Information

Applicant Name: Fieldstone Ridge, LLC
Mailing Address: c/o Dorian R. Famiglietti, Kahan, Kerensky, Capossela LLP 45 Hartford Tnpk, Vernon, CT 06066
Phone Number: 8608121765 **Email Address:** dfamiglietti@kkc-law.com

Applicable Section of the Zoning Regulations which pertains to the proposed activity:

Section 10-3.C.25 (Special Permit for multifamily development, providing water and sewer, in acordance with the requirements of Section 10-4)

Describe proposed buildings, site work, and use:

See attached Narrative

FEE SCHEDULE FOR SPECIAL PERMITS AND SITE PLANS

Special Permits & Site Plans*

Site Plan or Special Permit

Fee for a new building or addition:

- 1,000 gross square feet or less: $300
- 1001 to 10,000 gross square feet: $500
- 10,001 or greater gross square feet: $750 + $25 for each additional 1,000 gross square feet

No new building nor building addition:

$300 plus $0.005 (half cent) per square foot of newly disturbed land area.

Plus State Fee: $60

Revision of an Approved Site Plan

Fee: $150

Plus State Fee: $60

Multi-Family Special Permit and Site Plan

Fee: Whichever is greater: $50 per unit OR $1,000

Plus State Fee: $60

Golf Course Special Permit and Site Plan

Fee: $750 plus $10 per acre

Plus State Fee: $60

Removal of Earth Products

Fee:

- Less than 1,000 cubic yards (cy): $250
- 1,001 to 50,000 cy: $500
- 50,001 – 100,000 cy: $1,000
- More than 100,001 cubic yards: $2,000

Plus State Fee: $60

Removal of Earth Products - Post Approval

Annual Map Fee: $50

Campground

Fee: $250 plus $10 per campsite

Plus State Fee: $60

Campground – Post Approval

Annual Fee: $2 per campsite

Please submit the following with this form:

1. The fee must be submitted to be considered a complete application.
2. 7 paper copies and a pdf of the full plans, including all items required on the plans pursuant to Zoning Regulations.
3. The check list contained in Section 20-10 of the Zoning Regulations with an explanation of any submittal requirements for which the applicant seeks a waiver.

All of the above statements and the statements contained in any documents and plans submitted herewith are true to the best of my knowledge:

Applicant Signature: Dorian B. Famiglietti, attorney for applicant + owner **Date:** 2/16/2022

Property Owner Signature*: _____ **Date:** _____

*Or submit signed letter authorizing applicant to submit application on property owner's behalf.

NARRATIVE OF APPLICATION

Applicant: Fieldstone Ridge, LLC

Application: 10 Fieldstone Commons – Zoning Application

Date: February 16, 2022

Fieldstone Ridge, LLC (the "Applicant") seeks approval from the Tolland Planning and Zoning Commission for a Special Permit, and associated site plan, for a Multi-Family Development at property located at 10 Fieldstone Commons, Tolland, CT (the "Property"). The Property is located in the GDD Zone and contains approximately 51 acres. Multi-Family Development is an allowable Special Permit use per Section 10-3.C. 25 of the Zoning Regulations.

Wetlands have been field delineated upon the Property and the locations of the wetlands are shown on the attached plans. An application for a Wetlands Permit is being submitted to the Tolland Inlands Wetlands Commission simultaneously with this Zoning Application.

The Applicant proposes to develop 240 multi-family residential apartment units upon the Property. The units will be contained within 21 townhouse-style buildings. The development will also include a maintenance building, clubhouse, pool, sidewalks, walking trail and supporting infrastructure. Access to the development will be via the existing Fieldstone Commons driveway. The development will be serviced by public sewer and water.

A full traffic study, as required by Section 20-8.A.6 of the Zoning Regulations has been conducted, as detailed in the Site Traffic Evaluation Study, dated January 24, 2022, prepared by Bubaris Traffic Associates, and is submitted with the application (the "Traffic Report"). The Traffic Report concludes that the proposed development will not adversely impact traffic operations on the roadways surrounding the Property.

The details of the proposed stormwater management facilities are described in the Stormwater Management Report, dated February 4, 2022, prepared by Gardner & Peterson and submitted with this application (the "Drainage Report"). The Drainage Report describes the LID best management practices (in conformance with the Tolland Low Impact Development Design Manual) that will be implemented to preserve existing drainage patterns and address post-development quality and quantity of storm water runoff. The proposed stormwater management system has been designed to comply with the 2004 Connecticut Stormwater Quality Manual.

Details of the erosion and sediment controls are shown on the attached plans and are designed to minimize erosion and sedimentation during construction, stabilize the Property upon completion of construction and prevent any offsite erosion and/or sedimentation. The Erosion and Sediment Control Plan complies with the 2002 Connecticut Guidelines for Soil Erosion and Sediment Control.

PROJECT DESIGN TEAM:

FOR DETENTION BASIN SLOPES AND BOTTOMS, EXCEPT FOR SUNNY SOUTH AND WEST FACING UPPER SLOPES AND OTHER MOIST DISTURBED AREAS

New England Erosion Control/Restoration Mix For Detention Basins and Moist Sites

The New England Erosion Control/Restoration Mix for Detention Basins and Moist Sites contains a selection of native grasses and wildflowers designed to colonize generally moist, recently disturbed sites where quick growth of vegetation is desired to stabilize the soil surface. It is an appropriate seed mix for ecologically sensitive restorations that require stabilization as well as long-term establishment of native vegetation.

This mix is particularly appropriate for detention basins that do not hold standing water. Many of the plants in this mix can tolerate infrequent inundation, but not constant flooding. The mix may be applied by hand, by mechanical spreader, or by hydro-seeder. After sowing, lightly rake, roll or cultipack to insure good seed to soil contact. Best results are obtained with a Spring or late Summer seeding. Late Fall and Winter dormant seeding requires an increase in the application rate. A light mulching of clean, weed-free straw is recommended.

APPLICATION RATE: 35 lbs/acre | 1250 sq ft/lb

SPECIES: Riverbank Wild Rye (Elymus riparius), Creeping Red Fescue (Festuca rubra), Little Bluestem (Schizachyrium scoparium), Big Bluestem (Andropogon gerardii), Switch Grass (Panicum virgatum), Upland Bentgrass (Agrostis perennans), Nodding Bur Marigold (Bidens cernua), Hollow-Stem Joe Pye Weed (Eupatorium fistulosum/Eutrochium fistulosum), New England Aster (Aster novae-angliae), Boneset (Eupatorium perfoliatum), Blue Vervain (Verbena hastata), Soft Rush (Juncus effusus), Wool Grass (Scirpus cyperinus).

FOR UPLAND SLOPES WITH SANDY, DROUGHTY, DISTURBED SOIL, ESPECIALLY ON SOUTH AND WEST-FACING SLOPES
New England Conservation/Wildlife Mix

The New England Conservation/Wildlife Mix provides a permanent cover of grasses, wildflowers, and legumes. For both good erosion control and wildlife habitat value. The mix is designed to be a no maintenance seeding, and is appropriate for cut and fill slopes, detention basin side slopes, and disturbed areas adjacent to commercial and residential projects.

APPLICATION RATE: 25lbs/acre | 1750 sq ft/lb

SPECIES: Virginia Wild Rye (Elymus virginicus), Little Bluestem (Schizachyrium scoparium), Big Bluestem (Andropogon gerardii), Red Fescue (Festuca rubra), Switch Grass (Panicum virgatum), Partridge Pea (Chamaecrista fasciculata), Panicledleaf Tick Trefoil (Desmodium paniculatum), Indian Grass (Sorghastrum nutans), Blue Vervain (Verbena hastata), Butterfly Milkweed (Asclepias tuberosa), Black Eyed Susan (Rudbeckia hirta), Common Sneezeweed (Helenium autunale), Heath Aster (Asterpilosus/Symphyotrichum pilosum), Early Goldenrod (Solidago juncea), Upland Bentgrass (Agrostis perennans) (Helenium autumnale), (Aste/Symphiotrichum pilosus).

New England Roadside Matrix Upland Seed Mix

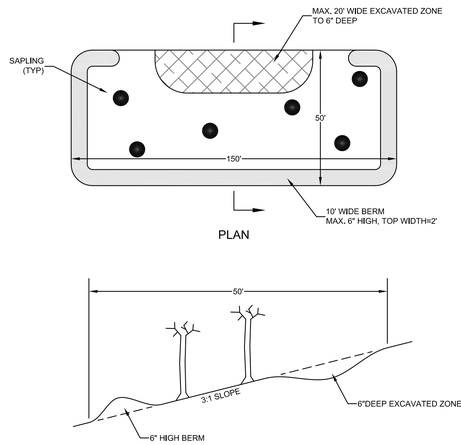
APPLICATION RATE: 35LBS/ACRE | 1250 sq ft/lb

SPECIES:
Grasses
Virginia Wild Rye (Elymus virginicus), Little Bluestem (Schizachyrium scoparium), Red Fescue (Festuca rubra), Big Bluestem (Andropogon gerardii), Indian Grass (Sorghastrum nutans), Switch Grass (Panicum virgatum)

Wildflowers
Partridge Pea (Chamaecrista fasciculata), Butterfly Milkweed (Asclepias tuberosa), Panicledleaf Tick Trefoil (Desmodium paniculatum), Beard Tongue (Penstemon digitalis), Black Eyed Susan (Rudbeckia hirta), Hollow-Stem Joe Pye Weed (Eupatorium fistulosum/Eutrochium fistulosum)

Shrubs
Grey Dogwood (Cornus racemosa), Silky Dogwood (Cornus amomum), Staghorn Sumac (Rhus typhina)

The New England Roadside Matrix Mixes are designed for use along roads and highways. These mixes are unusual in that they contain native grasses, wildflowers, and shrubs that are blended together as a native matrix seed mix. In areas that receive frequent mowing, the cold season grasses will dominate, such as those areas closet to the roadway shoulder. In areas farther from the road, which may be mown only once each year, or in hard to mow areas, such as around sign posts, the wildflower component will become dominant.. Along cuts and side slopes which may never be mown, the shrub component will add diversity and beauty to the roadside plantings.it is a particularly appropriate seed mix for roadsides, industrial sites, or cut and fill slopes. These mixes may be applied by hydroseeding, or by mechanical spreader. Always apply on a clean, wed-free seed bed. After sowing, lightly rake or roll the site to improve seed-to-soil contact. Best results are obtained with a mid-late spring seeding.summer seeding will benefit from a light mulching of clean, weed-free straw to conserve soil moisture



NOTES:
1. SALVAGE 4" OF TOPSOIL BEFORE GRADING.
2. INCORPORATE LEAF COMPOST TO DEPTH OF 12".
3. APPLY 4" LAYER AND INCORPORATE TO A DEPTH OF 12".
4. TOP DRESS WITH SALVAGED TOPSOIL.
5. OVER EXCAVATE WHEN GRADING TO ALLOW SPACE FOR LEAF COMPOST AND TOPSOIL.

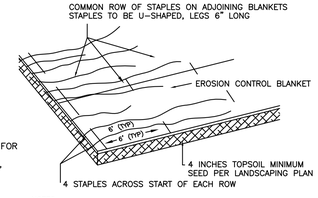
NOTES:
1. SEDIMENT CONTROL FABRIC TO BE A GEOTEXTILE MATERIAL TREATED TO RESIST DEGRADATION FROM EXPOSURE TO SUNLIGHT.
2. USE ONLY GEOTEXTILES WHICH ARE ALREADY ON THE CONNECTICUT DEPARTMENT OF TRANSPORTATION'S GEOTEXTILE APPROVED LIST OF GEOTEXTILES.
3. AFTER FOLDING FABRIC EDGE, BACKFILL TRENCH WITH TAMPED ORIGINAL SOIL OR AGGREGATE.
4. INSTALL PER 2002 CONNECTICUT GUIDELINES FOR SOIL EROSION AND SEDIMENT CONTROL.
5. FABRIC SHALL BE PREFABRICATED WITH 4"x4" 14.5 AWG WIRE MESH BACKING.

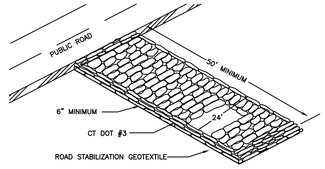
SILT FENCE INSTALLATION

NOT TO SCALE



NOTES:
1. APPLY ON SLOPES STEEPER THAN 3:1.
2. EROSION CONTROL BLANKET TO BE NORTH AMERICAN GREEN S 150 DOUBLE NET STRAW BLANKET OR EQUAL.
3. INSTALL ACCORDING TO MANUFACTURER'S RECOMMENDATIONS.

EROSION CONTROL BLANKET



CONSTRUCTION ENTRANCE

NOTES:
1. KEY STONE INTO THE DITCH BANKS AND EXTEND INTO THE ABUTMENTS A MINIMUM OF 18" TO PREVENT FLOW FROM FLANKING THE CHECK DAM.

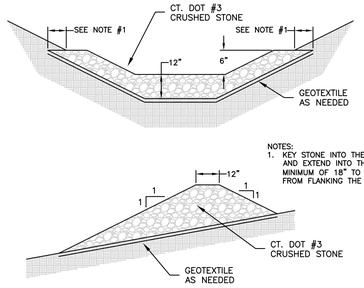
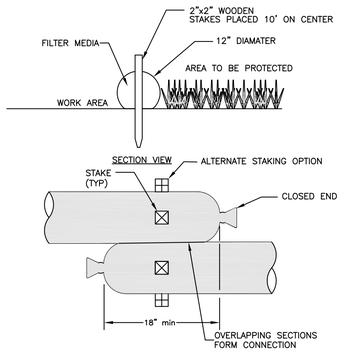
STOCKPILE EROSION PROTECTION DETAIL



NOTES:
1. KEY STONE INTO THE DITCH BANKS AND EXTEND INTO THE ABUTMENTS A MINIMUM OF 18" TO PREVENT FLOW FROM FLANKING THE CHECK DAM.

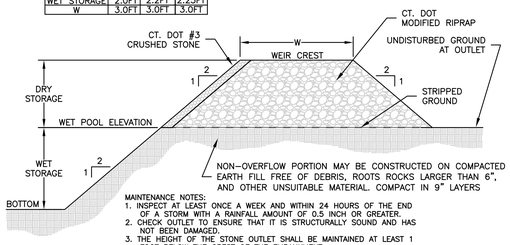
STONE CHECK DAM DETAIL

INSTALLATION INSTRUCTIONS:
1. CLEAR THE INSTALLATION AREA OF ANY DEBRIS, TREES, ROCKS OR LARGE OBSTRUCTIONS. SOCKS ARE DESIGNED TO COME IN CONTACT WITH THE SOIL, SO ANY STUMPS OR POTENTIAL OBSTRUCTIONS SHOULD BE REMOVED.
2. DIG A SHALLOW TRENCH IN THE LOCATION WHERE THE LOGS NEED TO BE PLACED.
3. PLACE THE LOGS IN THE TRENCH AND BACKFILL WITH SOIL SO THAT THE LOGS ARE TIGHTLY PACKED AGAINST THE SLOPE. ADJACENT LOGS SHOULD BE EITHER POSITIONED SO THAT THE ENDS FIT TIGHTLY AGAINST EACH OTHER AND ENDS SHOULD BE JOINED/SECURED TOGETHER WITH COIR TWINE OR OTHER SUITABLE TIES OR OVERLAPPED AS DESCRIBED BELOW.
4. FILTER MEDIA TO BE A COARSE COMPOSTED MATERIAL SPECIFICALLY DESIGNED FOR REMOVAL OF SOLIDS AND SOLUBLE POLLUTANTS FROM STORMWATER RUNOFF.
5. 10 L.F. ON EACH END SHALL BE PLACE AT A 30° ANGLE UP-SLOPE TO PREVENT END-AROUND FLOW.



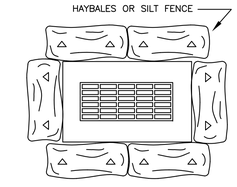
COIR LOG SEDIMENT BARRIER DETAIL

TRAP	#1	#2	#3
DRY STORAGE	1.6FT	1.7FT	1.75FT
WET STORAGE	2.0FT	2.2FT	2.25FT
W	3.0FT	3.0FT	3.0FT

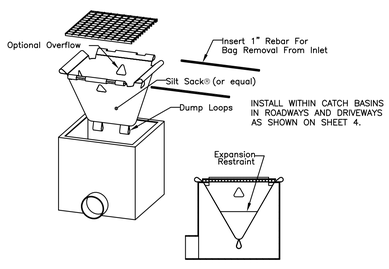


MAINTENANCE NOTES:
1. INSPECT AT LEAST ONCE A WEEK AND WITHIN 24 HOURS OF THE END OF A STORM WITH A RAINFALL AMOUNT OF 0.5 INCH OR GREATER.
2. CHECK OUTLET TO ENSURE THAT IT IS STRUCTURALLY SOUND AND HAS NOT BEEN DAMAGED.
3. THE HEIGHT OF THE STONE OUTLET SHALL BE MAINTAINED AT LEAST 1 FOOT BELOW THE CREST OF THE EMBANKMENT.
4. ONCE SEDIMENT HAS ACCUMULATED TO ONE-HALF OF THE WET STORAGE; DE-WATER TRAP, REMOVE SEDIMENT, AND RESTORE TO ORIGINAL DIMENSIONS.

TEMPORARY SEDIMENT TRAP DETAIL



CATCH BASIN AT LOW POINT



CATCH BASIN INLET PROTECTION

Maintenance Schedule

Maintenance Item	Frequency	Maintenance
Underground Stormwater Chambers	Visual Inspection Semi- Annually	• Remove inspection port caps to verify that runoff has infiltrated & leaves/debris are not collecting in system. • Check sediment depth and vacuum when 6" of sediment has accumulated.
Catch Basins	Monthly Annually	• Inspect grates for litter and debris and remove as needed • Remove sediment in sumps immediately after spring snowmelt
Sediment Forebay	Semi-Annually Every 5-years	• Maintain Stability of embankment • Mowing as needed • Remove sediment every 5 years or before sediment is within one-foot of the top of the forebay
Stormwater Basin	Semi-Annually 3-4 Times per Year	• Remove invasive vegetation. • Inspect embankment and inlet/outlet structures. • Monitor sediment accumulation. • Repair eroded areas. • Clean/remove sediment and debris. • Monitor sediment accumulation and remove when pool volume is reduced significantly. • Mow side slopes
Hydrodynamic Separator	Inspect Quarterly During Construction and Inspect Annually for Stabilized Site	• Remove Oil if there is an appreciable depth of oil in the unit (more than a sheen) • Remove Floatables when floatables other than oil cover over 50% of the open water surface on the inlet side of the outlet baffle wall. • Remove TSS/sediment when depths are greater than 30" in the inner chamber during construction or greater than 14" post-construction

PROJECT NARRATIVE

The purpose of this project is to construct 21 new multi-family buildings, a maintenance garage and clubhouse along with the driveways, parking and utilities to service the buildings. The proposed buildings are to be serviced by public water and sanitary sewer. Access to the site will be from new curb cut off of Fieldstone Commons road immediately across from the entrance to the shopping center parking lot.

Construction activities shall be conducted to minimize unstabilized area at one time. Construction shall commence with the installation of the construction entrance followed by tree cutting as shown on these plans. Sedimentation barriers shall be installed prior to stumping. The infiltration chamber areas shall be protected from construction activities and compaction prior to rough grading. Inspect condition of sedimentation barriers prior to rough grading.

Rough grading shall commence in areas where earth is to be excavated and placed as described in the construction schedule. Sediment basins and temporary sediment traps are to be excavated prior to rough grading of the watershed to each. Fill slopes are to be topsoiled and seeded after rough grading. Installation of the drainage structures, and piping shall proceed as the construction schedule allows. Leave grade 6" below catch basin tops to prevent silt laden runoff from entering the drainage system. Excavation of any building foundation can commence once the area is rough graded. Once fill has been placed in stumped area and slopes have been seeded for stabilization, further stumping and grading can commence as described in the construction schedule.

Completion of storm drainage and utility installation is to be followed by placing processed gravel, and final grading of the paved areas. The first coat of paved site drives can be installed once the foundations in that area have been poured and utilities have been installed. Infiltration chambers shall be installed once the watershed to each has been stabilized.

Once the watershed to each stormwater basin is stabilized, sediment shall be removed from the basin and catch basin sumps. Infiltration trenches with the basin (as applicable) can be installed, and the basin shall be seeded and/or planted as described on these plans.

All erosion control measures shall be maintained and upgraded as needed until stable vegetative growth has been established. At all times erosion of exposed and stockpiled materials shall be prevented using measures specified in these plans. Once the site is stabilized, sediment within the basin will be removed and the sediment will be seeded as depicted on these plans.

Proposed soil erosion and sediment control measures were designed using criteria set forth by the "Connecticut Guidelines for Soil Erosion and Sediment Control", revised to 2002.

TEMPORARY SEEDING SCHEDULE:

SPECIES	LBS/ACRE	LBS/1000SF	SEEDING DATES
ANNUAL RYEGRASS	40	1.0	3/1-6/15, 8/1-10/15
WINTER RYE	120	3.0	4/15-7/1, 8/15-10/15
SUDANGRASS	30	0.7	5/15-8/1

TEMPORARY SEEDING IS NOT LIMITED TO THE SPECIES SHOWN. OTHER SPECIES RECOMMENDED BY THE SCS OR AS LIMITED BY SITE CONDITIONS MAY BE USED.

STRAW MULCH IS TO BE APPLIED TO SEEDED AREA AT THE RATE OF 1-1/2 TO 2 TONS PER ACRE, 70 TO 90 LBS. PER 1000 SQ. FT.

FINAL SEEDING SCHEDULE:

PROVIDE 4 INCHES OF TOPSOIL MINIMUM, FREE OF ROOTS, LARGE STONES, AND OTHER OBJECTS.

SPECIES	LBS/ACRE	LBS/1000SF	SEEDING DATES
KENTUCKY BLUEGRASS	20	0.45	4/1-6/15, 8/15-10/1
CREEPING RED FESCUE	20	0.45	4/1-6/15, 8/15-10/1
PERENNIAL RYEGRASS	5	0.10	4/1-6/15, 8/15-10/1
TOTAL	45	1.00	

GENERAL EROSION AND SEDIMENT CONTROL NOTES

1. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE STANDARDS AND SPECIFICATIONS OF THE "GUIDELINES FOR SOIL EROSION AND SEDIMENT CONTROL" BY THE CONNECTICUT COUNCIL ON SOIL AND WATER CONSERVATION.
2. ALL SEDIMENT CONTROL PRACTICES AND MEASURES SHALL BE CONSTRUCTED, APPLIED AND MAINTAINED IN ACCORDANCE WITH THE APPROVED SEDIMENT CONTROL PLAN.
3. TOPSOIL REQUIRED FOR THE ESTABLISHMENT OF VEGETATION SHALL BE STOCKPILED IN THE AMOUNT NECESSARY TO COMPLETE THE FINISHED GRADING OF ALL EXPOSED AREAS.
4. AREAS TO BE FILLED SHALL BE CLEARED, GRUBBED AND STRIPPED OF TOPSOIL TO REMOVE TREES, VEGETATION, ROOTS OR OTHER OBJECTIONABLE MATERIAL.
5. ALL FILLS SHALL BE COMPACTED AS REQUIRED TO MINIMIZE EROSION, SLIPPAGE, AND SETTLEMENT. FILL INTENDED TO SUPPORT STRUCTURES, DRAINAGE, ETC. SHALL BE COMPACTED IN ACCORDANCE WITH THE APPROPRIATE STATE AND/OR LOCAL SPECIFICATIONS.
6. FILL MATERIAL SHALL BE FREE OF BRUSH, RUBBISH, LARGE ROCKS, LOGS, STUMPS, BUILDING MATERIAL, COMPRESSIBLE MATERIAL, AND OTHER MATERIALS WHICH MAY INTERFERE WITH OR PREVENT CONSTRUCTION OF SATISFACTORY FILLS.
7. FROZEN MATERIAL OR SOFT MUCKY OR HIGHLY COMPRESSIBLE MATERIALS SHALL NOT BE INCORPORATED INTO FILLS.
8. FILL SHALL NOT BE PLACED ON A FROZEN FOUNDATION.
9. ALL BENCHES SHALL BE KEPT FREE OF SEDIMENT DURING ALL PHASES OF DEVELOPMENT.
10. SEEPS OR SPRINGS ENCOUNTERED DURING CONSTRUCTION SHALL BE HANDLED IN ACCORDANCE WITH SOUND CONSTRUCTION PRACTICE.
11. ALL GRADED AREAS SHALL BE PERMANENTLY STABILIZED IMMEDIATELY FOLLOWING FINISH GRADING. IF FINISH GRADING IS TO BE DELAYED FOR MORE THAN 30 DAYS AFTER DISTURBANCE IS COMPLETE, TEMPORARY SOIL STABILIZATION MEASURES SHALL BE APPLIED. AREAS LEFT OVER 30 DAYS SHALL BE CONSIDERED "LONG TERM" AND SHALL RECEIVE TEMPORARY SEEDING WITHIN THE FIRST 15 DAYS.
12. SITE IS TO BE GRADED TO PERMIT THE USE OF CONVENTIONAL EQUIPMENT FOR SEEDBED PREPARATION, SEEDING, MULCHING, AND MAINTENANCE UNLESS OTHERWISE SPECIFIED IN THE PLANS.
13. CUT AND FILL SLOPES SHALL NOT BE STEEPER THAN 2:1. TOPSOIL SHALL BE SPREAD TO A MINIMUM DEPTH OF 4". ADDITIONAL TOPSOIL MAY BE REQUIRED TO MEET MINIMUM DEPTHS. NO TOPSOIL SHALL BE REMOVED FROM THIS SITE.
14. APPLY SEED UNIFORMLY BY HAND, CYCLONE SEEDER, DRILL CULTIPACKER TYPE SEEDER, OR HYDROSEEDER (SLURRY INCLUDING SEED AND FERTILIZER). NORMAL SEEDING DEPTH IS FROM 1/4" TO 1/2" INCH. HYDROSEEDING WHICH IS MULCHED MAY BE LEFT ON THE SOIL SURFACE.
15. WHERE FEASIBLE, EXCEPT WHERE EITHER A CULTIPACKER TYPE SEEDER OR HYDROSEEDER IS USED, THE SEEDBED SHOULD BE FIRMED FOLLOWING SEEDING WITH A ROLLER OR LIGHT DRAG.
16. FERTILIZER AND LIME ARE TO BE WORKED INTO THE SOIL AS NEARLY AS PRACTICAL TO A DEPTH OF 4 INCHES WITH A DISC, SPRING TOOTH HARROW OR OTHER SUITABLE EQUIPMENT. THE FINAL HARROWING OR DISC OPERATION SHOULD BE ALONG THE CONTOUR.
17. REMOVE FROM THE SURFACE ALL STONES TWO INCHES OR LARGER. REMOVE ALL OTHER DEBRIS SUCH AS WIRE, TREE ROOTS, PIECES OF CONCRETE, OR OTHER UNSUITABLE MATERIALS.
18. INSPECT SEEDBED BEFORE SEEDING. IF TRAFFIC HAS LEFT THE SOIL COMPACTED, THE AREA MUST BE RETILLED BEFORE SEEDING, THEN FIRMED AS DESCRIBED ABOVE.
19. WHERE GRASSES PREDOMINATE, FERTILIZE ACCORDING TO SOIL ANALYSIS, OR SPREAD 300 POUNDS OF 10-10-10 OR EQUIVALENT PER ACRE (7.5 POUNDS PER 1000 S.F.).
20. CALCIUM CHLORIDE WILL BE AVAILABLE FOR DUST CONTROL ON GRAVEL TRAVEL SURFACES.

TURF MANAGEMENT PLAN

1. Soil Testing
A composite soil sample from the subject property will be collected and delivered to a University of Connecticut Cooperative Extension office for testing of soil nutrient levels (i.e., pH, nitrogen, phosphorus, calcium, magnesium, potassium) prior to a fertilizer application. The Extension office will recommend a fertilizer application rate based upon these test results. The actual fertilizer application rate will follow this recommendation. This will ensure against an excessive fertilizer application, which could lead to chemical leaching or export.

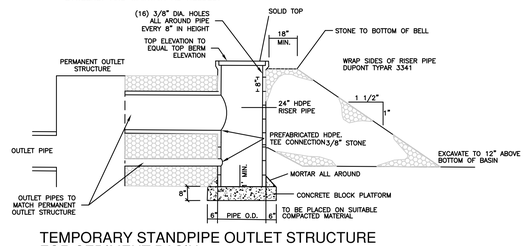
2. Slow-Release Fertilizers
Slow-release fertilizers will be applied to lawns, planted trees and shrubs. These can include, but are not limited to, organic-based fertilizers. A variety of commercial slow-release nitrogen fertilizer products are available (e.g., Milorganite, isobutylidene diurea, coated ureas, etc.). Advantages of slow-release fertilizers include the supply of a steady nitrogen source, and reduced nitrogen leaching. By combining small amounts of soluble nitrogen sources with slow release nitrogen products, nitrogen availability can be extended without a threat of leaching.

3. Fertilizer Application Schedule
Fertilizer will be applied three times annually to the subject property: early to late May (after the threat of cool, wet weather has passed), late August to early September, and mid-September to mid-October. If the soil test indicates a need for lime, it will be applied at the last fertilization date.

4. Integrated Pest Management (IPM)
IPM is an integrated, preventative approach to maintaining healthy turf and landscape plants. IPM recognizes that, although chemicals are an important component of a turf management plan, other strategies are available to maintain a healthy lawn. A central premise of IPM is to treat pest problems as they arise on an as-needed basis only, using a variety of biological (e.g., natural predators), chemical and cultural (e.g., disease-resistant seed) practices.

To be successful, IPM requires periodic monitoring by an experienced practitioner to detect pest problems at an early stage and develop an effective, environmentally responsible action plan. It is recommended that the contractor that is hired to maintain the grounds have training and experience in the practice of IPM.

TEMPORARY STAND PIPE OUTLET SHALL NOT BE REMOVED UNTIL ALL SITE IMPROVEMENTS WITHIN THE DRAINAGE AREA TO THE CORRESPONDING BASIN ARE CONSTRUCTED AND THE SITE IS STABILIZED. INSPECT STRUCTURE BIWEEKLY AND MAINTAIN AS NEEDED.



TEMPORARY STANDPIPE OUTLET STRUCTURE FOR SEDIMENT BASIN

CONSTRUCTION SCHEDULE & EROSION & SEDIMENT CONTROL CHECKLIST

PROJECT NAME: FIELDSTONE RIDGE

LOCATION: 10 FIELDSTONE COMMONS – TOLLAND, CT

PROJECT DESCRIPTION: MULTI-FAMILY HOUSING DEVELOPMENT

PARCEL AREA: 50.7 AC.

RESPONSIBLE PERSONNEL: KEVIN SANTINI, 1031 HARTFORD TPKE, VERNON, CT 860-871-0516

WORK DESCRIPTION	EROSION & SEDIMENT CONTROL MEASURES	DATE INSTALLED	INITIALS
CLEAR ALL TREES AND BRUSH AS DEPICTED ON PLANS	INSTALL ANTI-TRACKING PAD		
REMOVE STUMPS ON NORTHERLY PORTION OF SITE IN VICINITY OF NORTHERLY STORMWATER BASIN, CLUBHOUSE, MAINTENANCE BUILDING, AND BUILDING #1 FOR FILLING.	INSTALL SEDIMENT BARRIERS DOWNGRADE OF CONSTRUCTION ACTIVITY AS SHOWN PRIOR TO STUMPING		
REMOVE STUMPS IN AREA TO BE EXCAVATED IN VICINITY OF BUILDINGS #3 THROUGH #11 & #13.	INSTALL INLET PROTECTION IN EXISTING CATCH BASINS		
	PROTECT INFILTRATION CHAMBER AREAS FROM DISTURBANCE AND COMPACTION		
ROUGH GRADE NORTHERLY PORTION OF SITE	CONSTRUCT TEMPORARY SEDIMENT TRAPS #1 & #2, SWALES AND NORTHERLY SEDIMENT BASIN. EXCAVATE BASIN TO 12" ABOVE BOTTOM		
CONSTRUCT NEW DRAINAGE FROM FIELDSTONE COMMONS AND BIG Y.	PROTECT STOCKPILE AREAS WITH SILT FENCE		
	INSPECT AND MAINTAIN SEDIMENT BARRIERS WEEKLY AND AFTER RAIN EVENTS OVER 0.5-INCH.		
EXCAVATE FOR FOUNDATIONS OF CLUBHOUSE, MAINTENANCE BUILDING, AND BUILDINGS #1 & #3.	TOPSOIL, SEED AND MULCH SLOPES		
ONCE FILL HAS BEEN PLACED IN PREVIOUSLY STUMPED AREA, STUMP FILL AREA IN VICINITY OF BUILDINGS #2, #12, #14 & #15.	INSTALL SEDIMENT BARRIERS DOWNGRADE OF CONSTRUCTION ACTIVITY AS SHOWN PRIOR TO STUMPING		
	PROTECT INFILTRATION CHAMBER AREAS FROM DISTURBANCE AND COMPACTION		
ROUGH GRADE STUMPED PORTION OF SITE	PROTECT STOCKPILE AREAS WITH SILT FENCE		
	INSPECT AND MAINTAIN SEDIMENT BARRIERS WEEKLY AND AFTER RAIN EVENTS OVER 0.5-INCH.		
EXCAVATE FOR FOUNDATIONS OF BUILDINGS #2 & #4 THROUGH #15	TOPSOIL, SEED AND MULCH SLOPES		
INSTALL SEWER, DRAINAGE AND UTILITIES	INSTALL HAYBALES AROUND NEW CATCH BASINS INLETS ONCE INSTALLED		
INSTALL PAVEMENT BINDER COAT IN AREAS WHERE FOUNDATIONS AND UTILITIES ARE COMPLETE	TOPSOIL, SEED AND MULCH AREA ADJACENT TO EACH BUILDING AS IT IS COMPLETED		
REMOVE STUMPS ON SOUTHERLY PORTION OF SITE	INSTALL SEDIMENT BARRIERS DOWNGRADE OF CONSTRUCTION ACTIVITY AS SHOWN PRIOR TO STUMPING		
ROUGH GRADE SOUTHERLY PORTION OF SITE	CONSTRUCT TEMPORARY SEDIMENT TRAP#3 AND SOUTHERLY SEDIMENT BASIN. EXCAVATE BASIN TO 12" ABOVE BOTTOM		
	PROTECT INFILTRATION CHAMBER AREAS FROM DISTURBANCE AND COMPACTION		
	PROTECT STOCKPILE AREAS WITH SILT FENCE		
	INSPECT AND MAINTAIN SEDIMENT BARRIERS WEEKLY AND AFTER RAIN EVENTS OVER 0.5-INCH.		
	INSTALL CHECK DAMS WHERE SHOWN ONCE ROADWAY IS EXCAVATED		
EXCAVATE FOR REMAINING FOUNDATIONS	TOPSOIL, SEED AND MULCH SLOPES		
	INSTALL EROSION BLANKET ON SLOPES STEEPER THAN 3:1		
INSTALL SEWER, DRAINAGE AND UTILITIES	TOPSOIL, SEED AND MULCH AREA ADJACENT TO EACH BUILDING AS IT IS COMPLETED		
INSTALL PAVEMENT BINDER COAT IN AREAS WHERE FOUNDATIONS AND UTILITIES ARE COMPLETE			
INSTALL INFILTRATION CHAMBERS ONCE WATERSHED TO EACH CHAMBER IS STABILIZED			
FINAL GRADE AND FINAL PAVE	TOPSOIL, SEED AND MULCH DISTURBED AREAS		
ONCE WATERSHED TO EACH STORMWATER BASIN IS STABILIZED, FINALIZE BASIN CONSTRUCTION	REMOVE SEDIMENT FROM DRAINAGE STRUCTURES AND BASINS. INSTALL INFILTRATION TRENCHES WITHIN NORTHERLY BASIN. SEED AND PLANT BASINS PER PLANS.		
	REMOVE EROSION CONTROLS WHEN SITE IS STABILIZED		

PROJECT DATES:
DATE OF CONSTRUCTION START JUNE 1, 2022
DATE OF CONSTRUCTION COMPLETION MAY 31, 2025

EROSION AND SEDIMENT CONTROL PROCEDURES SHALL ESSENTIALLY BE IN ACCORDANCE WITH THESE PLANS, AS REQUIRED BY TOWN REGULATIONS, AND THE MANUAL, "GUIDELINES FOR SOIL EROSION AND SEDIMENT CONTROL" FOR CONNECTICUT, BY THE COUNCIL ON SOIL AND WATER CONSERVATION, 1985, REVISED TO 2002.

REVISIONS

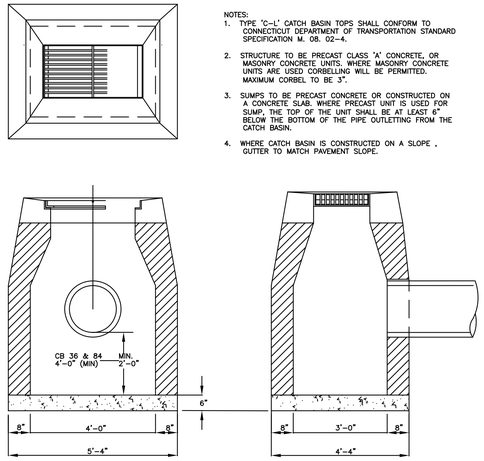
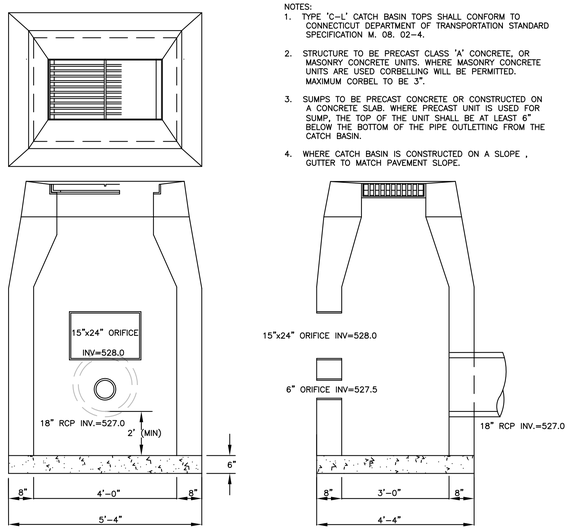
NOTES:
1. TYPE "C" CATCH BASIN TOPS SHALL CONFORM TO CONNECTICUT DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATION M. 08. 02-4.
2. STRUCTURE TO BE PRECAST CLASS 'A' CONCRETE, OR MASONRY CONCRETE UNITS. WHERE MASONRY CONCRETE UNITS ARE USED CORBELLING WILL BE PERMITTED. MAXIMUM CORBEL TO BE 3".
3. SUMPS TO BE PRECAST CONCRETE OR CONSTRUCTED ON A CONCRETE SLAB. WHERE PRECAST UNIT IS USED FOR SUMP, THE TOP OF THE UNIT SHALL BE AT LEAST 6" BELOW THE BOTTOM OF THE PIPE OUTLETTING FROM THE CATCH BASIN.
4. WHERE CATCH BASIN IS CONSTRUCTED ON A SLOPE, GUTTER TO MATCH PAVEMENT SLOPE.

TYPE "C" CATCH BASIN



NOTES:
1. TYPE 'C-L' CATCH BASIN TOPS SHALL CONFORM TO CONNECTICUT DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATION M. 08. 02-4.
2. STRUCTURE TO BE PRECAST CLASS 'A' CONCRETE, OR MASONRY CONCRETE UNITS. WHERE MASONRY CONCRETE UNITS ARE USED CORBELLING WILL BE PERMITTED. MAXIMUM CORBEL TO BE 3".
3. SUMPS TO BE PRECAST CONCRETE OR CONSTRUCTED ON A CONCRETE SLAB. WHERE PRECAST UNIT IS USED FOR SUMP, THE TOP OF THE UNIT SHALL BE AT LEAST 6" BELOW THE BOTTOM OF THE PIPE OUTLETTING FROM THE CATCH BASIN.
4. WHERE CATCH BASIN IS CONSTRUCTED ON A SLOPE , GUTTER TO MATCH PAVEMENT SLOPE.

TYPE "C-L" CATCH BASIN



NOTES:
1. TYPE 'C-L' CATCH BASIN TOPS SHALL CONFORM TO CONNECTICUT DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATION M. 08. 02-4.
2. STRUCTURE TO BE PRECAST CLASS 'A' CONCRETE, OR MASONRY CONCRETE UNITS. WHERE MASONRY CONCRETE UNITS ARE USED CORBELLING WILL BE PERMITTED. MAXIMUM CORBEL TO BE 3".
3. SUMPS TO BE PRECAST CONCRETE OR CONSTRUCTED ON A CONCRETE SLAB. WHERE PRECAST UNIT IS USED FOR SUMP, THE TOP OF THE UNIT SHALL BE AT LEAST 6" BELOW THE BOTTOM OF THE PIPE OUTLETTING FROM THE CATCH BASIN.
4. WHERE CATCH BASIN IS CONSTRUCTED ON A SLOPE , GUTTER TO MATCH PAVEMENT SLOPE.

OUTLET STRUCTURE #39

HYDRODYNAMIC SEPARATOR REQUIREMENTS:
The hydrodynamic separator located at HS 5A must be designed to remove a minimum of 80% of the total suspended solids from the water quality flow of 1.15 cfs with an internal bypass of the 10-year design storm flow of 7.3 cfs. The system must first be approved by the design engineer then submitted to the town for review prior to fabrication. Shop drawing submittals must include:

- "treated" flow for the specified system and model, which must be equal or exceed the water quality flow
- "conveyed" flow for the specified system and model, which must be equal or greater that the design storm flow
- calculations or documentation verifying that 80% (min.) of the average annual total suspended solids will be removed from the water quality flow
- calculations of the hydraulic grade line elevations for the design storm event in the first structure located upstream of the system and any other critical locations
- orientation of the system in plan view with respect to the approved site plan (if different than shown on the approved plans)
- proposed size and elevation of critical weir, orifice, pipe invert elevations, and other design elements that correspond to the hydraulic characteristics of the system

GENERAL NOTES
1. BOTTOM OF CHAMBERS TO BE 3' ABOVE SHGW AND BEDROCK.
2. ALL CHAMBERS MUST BE INSTALLED IN ACCORDANCE WITH ALL APPLICABLE LOCAL, STATE AND FEDERAL REGULATIONS.

CONSTRUCTION AND MAINTENANCE REQUIREMENTS:
1. INFILTRATION CHAMBERS SHALL NEVER BE USED FOR SEDIMENT CONTROL DURING AN ACTIVE CONSTRUCTION PERIOD.
2. THE AREA OF THE INFILTRATION TRENCH MUST BE MARKED OFF BY APPROPRIATE FENCING TO PREVENT THE MOVEMENT OF CONSTRUCTION VEHICLES OVER AND THE POSSIBLE COMPACTION OF THE NATURAL SOILS.
3. THE EROSION CONTROL PLAN FOR THE PROJECT MUST CLEARLY DEFINE HOW SEDIMENT WILL BE PREVENTED FROM ENTERING THE AREA OF THE INFILTRATION CHAMBERS.
4. THE DESIGN ENGINEER SHALL OVERSEE THE PREPARATION OF THE AREA AND THE INSTALLATION OF THE INFILTRATION CHAMBERS. CONTRACTOR SHALL PROVIDE ENGINEER THE INSTALLATION SCHEDULE TO PROVIDE TIMELY INSPECTIONS.
5. THE DESIGN ENGINEER SHALL PROVIDE A CERTIFICATION THAT THE SYSTEM WAS DESIGNED IN ACCORDANCE WITH THE SPECIFICATIONS FOUND IN THE DESIGN MANUAL AND INSTALLED IN ACCORDANCE WITH THE APPROVED PLANS.

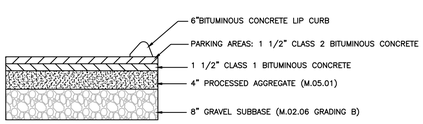
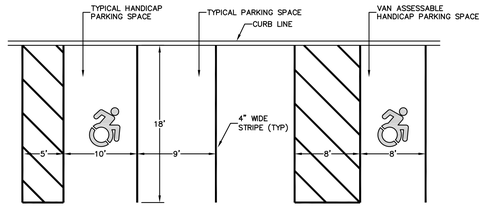
NOTE:
PROVIDE TACTILE WARNGING STRIP CONFORMING WITH SECTION 705 OF THE ADA STANDARDS FOR ACCESSIBLE DESIGN AT ALL RAMPS, CHANGES IN SURFACE MATERIAL AND AS REQUIRED BY SAID STANDARDS.

4' CONCRETE SIDEWALK

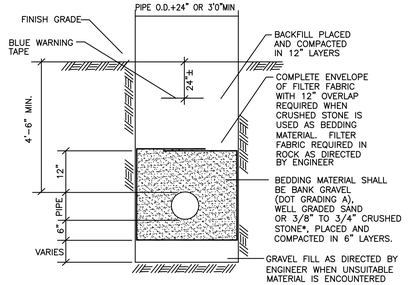


BITUMINOUS PAVEMENT CROSS SECTION



PAVEMENT MARKING NOTES:
1. All work to conform to Form 816, Section 12.09 and the manufacturer's instructions and recommendations for application.
2. Lines shall be four (4) inches wide, except as noted, and 15 mils thick, colored white, except as noted.
3. Paint shall be either white or tinted ready–mixed paint conforming to AASHTO M70, Type 1.
4. Epoxy Resins shall conform to Form 816 and project requirements for layout of crosswalks. Install glass beads by free fall method.
5. Prior to painting, sweep pavement with power broom supplemented with hand brooms to eliminate loose material and dust.
6. After applying paint, erect suitable barriers to prevent tracking of paint before drying. Retouch and paint all markings which become smeared, discolored, worn, or otherwise marred before final acceptance of the project. Remove any evidence of smearing of paint.

PAINTED PARKING STALL DETAIL



CONNECTICUT WATER COMPANY NOTES:
1. FIELD–LOK GASKETS ARE REQUIRED ON THE (2) PIPE JOINTS BEFORE AND AFTER ALL FITTINGS.
2. MEGALUG RESTRAINTS ARE REQUIRED AT ALL FITTINGS.
3. ALL BENDS, TEES, OFFSETS, HYDRANTS, AND DEAD ENDS REQUIRE THRUST BLOCKS.

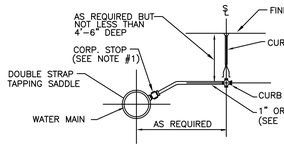
*CRUSHED STONE SHALL ONLY BE USED IN HIGH GROUNDWATER CONDITIONS AS DIRECTED BY THE ENGINEER

WATER TRENCH DETAIL

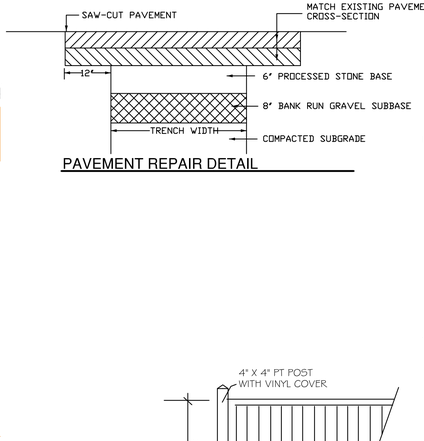
NOTES:

1. THE TOP OF THE CORPORATION AND THE FIRST THREE (3) FEET OF COPPER TUBING SHALL BE INSTALLED NO HIGHER THAN THE TOP OF THE WATER MAIN.

2. NO INTERMEDIATE SIZES (i.e. 3/4", 1–1/2", 1–3/4") ARE ALLOWED FOR COPPER SERVICES. ANY SERVICE REQUIREMENT GREATER THAN 2" COPPER SHALL BE CLDIP (4"MIN.) WITH THE SHUT–OFF LOCATED AT THE MAIN. COPPER TUBING SHALL BE CONTINUOUS BETWEEN THE CORPORATION STOP AND THE CURB STOP.



WATER SERVICE CONNECTION (MAINTENANCE & CLUBHOUSE)



PAVEMENT REPAIR DETAIL

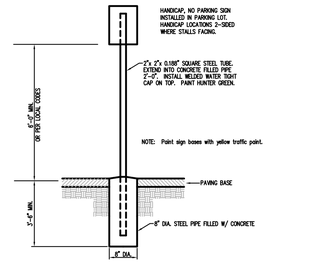
NOTE: ALL STRIPES TO BE 4" PAINTED WHITE

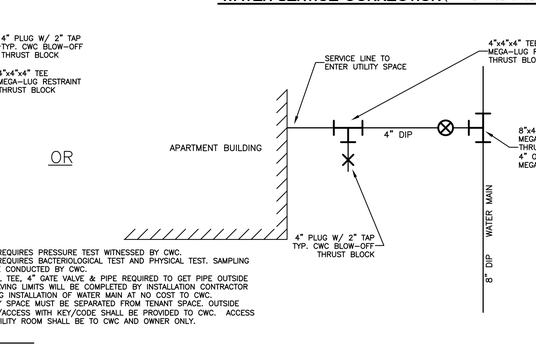
PAINTED HANDICAP SYMBOL

NOTES:
1. PROVIDE DETECTABLE WARNING FOR CURB RAMPS. DETECTABLE WARNING SHALL CONSIST OF TRUNCATED DOME SURFACE ON RIGID TACTILE PAVING TILES. TILES SHALL BE 2'x3' FOR 4' WIDE RAMPS AND 2'x4' FOR 5' WIDE RAMPS. TILE COLOR SHALL CONTRAST WITH THAT OF THE SURROUNDING SURFACE.

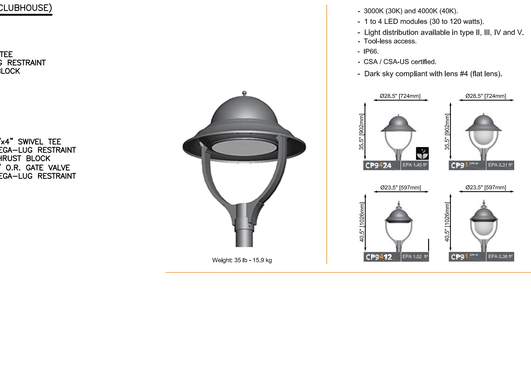
2. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO CONSTRUCT HANDICAP SPACING, GRADING SIGNAGE AND APPURTENANCE IN ACCORDANCE WITH CURRENT FEDERAL, STATE OR LOCAL CODES. THE CONTRACTOR SHALL CONSULT WITH THE LOCAL BUILDING OFFICIAL TO OBTAIN CURRENT INFORMATION



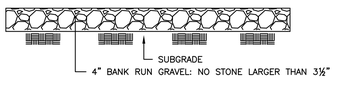
ACCESSIBLE PARKING AND SIGNAGE STANDARDS



NOTES:
1. LINE REQUIRES PRESSURE TEST WITNESSED BY CWC.
2. LINE REQUIRES BACTERIOLOGICAL TEST AND PHYSICAL TEST. SAMPLING TO BE CONDUCTED BY CWC.
3. SWIVEL TEE, 4" GATE VALVE & PIPE REQUIRED TO GET PIPE OUTSIDE OF PAVING LIMITS WILL BE COMPLETED BY INSTALLATION CONTRACTOR DURING INSTALLATION OF WATER MAIN AT NO COST TO CWC.
4. UTILITY SPACE MUST BE SEPARATED FROM TENANT SPACE. OUTSIDE DOOR/ACCESS WITH KEY/CODE SHALL BE PROVIDED TO CWC. ACCESS TO UTILITY ROOM SHALL BE TO CWC AND OWNER ONLY.



TYPICAL WATER SERVICE CONNECTION



NOTES:
1. DRIVE SHALL HAVE A WIDTH OF 10 FT.
2. SIDE SLOPES SHALL NOT EXCEED 3:1.

Design Advisory Board

Meeting Minutes

21 Tolland Green, Level 2, Conference Room B, Tolland, Connecticut

Thursday, March 3, 2022

Members Present: Sudhakar Nagardeolekar (Chair), Vikas Nagardeolekar (Vice Chair), Bill Byers, Kimberly Rogers

Others Present: David Corcoran (Director of Planning & Development), Kevin Santini, Eric Santini, Eric Peterson

S. Nargardeolekar called the meeting to order at 7:03 PM

10 Fieldstone Commons – Applicant: Fieldstone Ridge, LLC – Review of Landscaping and Building Design.

The 10 Fieldstone Commons application was discussed. The applicant Fieldstone Ridge, LLC for the 10 Fieldstone project made a detailed presentation. The Drawings presented for review at this meeting met the criteria set by the Design Advisory Board. The Design Advisory Board noted they received a meeting notice on February 24, 2022, for a meeting to be held on March 3, 2022. This time line did not allow DAB Members to review the drawing in detail for their comments. In general, the project design as presented to DAB, is satisfactory. DAB needs to review in detail following items:

1) Detail review of proposed landscaping.

2) Review of proposed Building material samples and color co-ordination.

The Design Advisory Board is also concerned about the secondary means of egress from the project site, for providing proper turning radius for firefighting equipment

DAB Member Re-Appointment –

Everybody is interested in being appointed. Discussed open position and trying to fill the empty slot. D. Corcoran will work with Town to send an e-mail blast for the position. They are looking for somebody with landscape/design experience and plant knowledge.

Approve Minutes – August 5, 2021 Regular Meeting

V. Nagardeolekar moved and K. Rogers seconded to approve the minutes.

The meeting was adjourned at 8:15 PM.

Respectfully Submitted,

David Corcoran, Director of Planning and Development
