Thankyou for your response! If I can add one additional suggestion for the council to consider; It would be really nice if there were some places to pull over at Shenipsit Lake just to enjoy the views! And perhaps some parking where the canoes & kayaks are kept would be a big plus. Thanks for your consideration! Brian & Marjorie Vagell

Thank you for your note...it will become part of all the correspondences that we receive.

The Charter Revision process started back in November with the first public hearing asking what townspeople would like to see changed. We..the Committee...then asked for input from Town staff and anyone who came to our monthly ...sometimes twice monthly ...meetings since November.

We now have all our suggested changes together, which we are presenting at a public meeting in April. The suggested revised charter will then be formally presented to the Town Council in May. The Council will then hold public hearings asking for public input and may make more suggested changes. After all that, it will be presented in November for a referendum vote, at which the entire Town has an opportunity to vote on the suggested changes.

I believe, firmly, that the Town will, by November, have more than enough time to weigh in on the changes. Do you?
